

Miami-Dade County

Florida

County Health Workforce Brief

A sourced view of shortage designations, health center presence, population and healthcare industry employment and pay. Built for early planning, with complete data tables for this edition.

HPSA designations†	MUA/P records†	Health center sites†
88	16	221

† ClarityPoint counts of included HRSA records. Designations can overlap or span counties. Site presence does not measure available appointments or staffed capacity.

SOURCE EDITION

HRSA download 2026-09-03 - BLS QCEW 2024 - ACS 5-year 2019-2023

workforce-v2-f29e1436db62e028ad5f

Source periods and acquisition dates differ. The evidence reflects the cited edition, not a live feed. Missing values remain unavailable; they are never filled with zeros.

For research and preliminary planning. Does not establish program eligibility, clinical quality or commercial feasibility.

Not affiliated with or endorsed by HRSA, HHS, CMS, BLS, Census, or HUD.

Designations by discipline

Active designations† — Primary Care 38 - Dental Health 30 - Mental Health 20 - Rural / partially rural designation present: Yes

Each discipline is a distinct HRSA shortage designation type. Every figure in this table is an ClarityPoint calculation across the county's HRSA designation rows: ClarityPoint groups the rows by discipline, counts them, takes the highest published federal HPSA priority score (primary care/mental health 0-25; dental 0-26), sums the published FTE-short and underserved-population figures, and selects the most severe published ratio. HRSA publishes the per-designation values (reproduced unchanged in the designation detail table), not these discipline rollups. FTE short and underserved population are attributed (not exclusive) to this county.

Discipline	Designations†	Max HPSA score†	FTE short†	Underserved pop.†*	Worst ratio†
Primary Care	38	21	224.85	636,865	113520:1
Dental Health	30	25	168.39	657,286	94300:1
Mental Health	20	23	54.78	564,924	49554:1

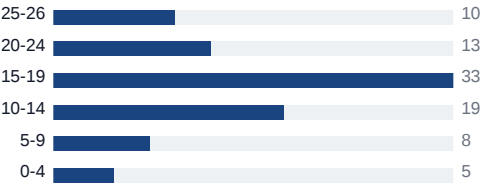

* Underserved population is a designation-level figure attributed to each county served — multi-county designations contribute their full figure to every county, so the discipline totals are not county-exclusive and should not be summed across disciplines as unique people.

† = ClarityPoint calculation. Every figure carrying this mark was computed by ClarityPoint from the public source files listed under Sources — counts, sums, medians, averages, percentages, coverage rates, shares, per-capita rates, percentiles, distributions, and composite or index values. ClarityPoint calculations are not published, reviewed, approved, or endorsed by any federal agency and must not be cited or reported as agency figures. Figures without the mark are reproduced as the source agency published them.

HPSA score distribution†

Distributions are ClarityPoint counts of published values grouped into bands; the underlying values are as published, the grouping and the counts are ClarityPoint's.

Active designations by score band (0-26)†

Safety-net site presence (MUA/P & FQHC)

Population and safety-net context for the 2,685,296 residents of this county (452,114 age 65+). Federally Qualified Health Centers and Medically Underserved Area/Population designations describe designated areas and service locations. Site counts do not measure staffed capacity, patient access, vacancies, or commercial demand.

MUA/P DESIGNATIONS†	LOWEST IMU SCORE†	ACTIVE FQHC SITES†	GRANTEE SITES†
16	28.4	221	221
LOOK-ALIKE SITES†	FQHC SITES PER 100K POP.†		
0	8.23		

Index of Medical Underservice (IMU): 0-100, lower = more underserved; 62.0 or below is the usual score threshold; designation depends on HRSA criteria, and Governor's Exception designations also exist. Tile figures above are ClarityPoint counts, minima, and per-population rates across the county's HRSA rows; the designation table below reproduces HRSA's published values unchanged. † = ClarityPoint calculation. Every figure carrying this mark was computed by ClarityPoint from the public source files listed under Sources — counts, sums, medians, averages, percentages, coverage rates, shares, per-capita rates, percentiles, distributions, and composite or index values. ClarityPoint calculations are not published, reviewed, approved, or endorsed by any federal agency and must not be cited or reported as agency figures. Figures without the mark are reproduced as the source agency published them.

Health-workforce labor market (BLS QCEW wages)

Private-sector labor-market context from the U.S. Bureau of Labor Statistics Quarterly Census of Employment and Wages (QCEW 2024 (private ownership)). The industry table below reproduces QCEW cells exactly as BLS published them; the combined jobs figure for NAICS 621 + 623 is an ClarityPoint calculation, not a BLS total for all healthcare employment. Home health (6216) is a subset of 621 and is displayed separately, never added twice. A suppressed or missing component makes the combined figure unavailable. Hospitals (622) are excluded. Figures are county AVERAGES for broad private-ownership healthcare industries — not occupation-specific, not medians, not adjusted for hours. Cells BLS suppressed for disclosure render as not available, never zero.

JOB [†] S IN NAICS 621 + 623	AMBULATORY AVG ANNUAL PAY	HOME HEALTH AVG ANNUAL PAY	NURSING/RES. AVG ANNUAL PAY
94,883	\$71,081	\$50,008	\$45,043

Employment, establishments & pay by healthcare industry (NAICS)

Values in this section are reproduced as published by the source agency and carry no ClarityPoint calculation mark (†).

Industry (NAICS)	Avg employment	Establishments	Avg weekly wage	Avg annual pay
Ambulatory health care services (621)	79,353	9,415	\$1,367	\$71,081
Home health care services (6216)	13,540	746	\$962	\$50,008
Nursing & residential care facilities (623)	15,530	579	\$866	\$45,043

QCEW 2024 average annual pay is total annual payroll divided by average annual employment — a mean per covered job, not a median wage, and not occupation-specific. Coverage is private ownership only (ownership code 5); government and self-employed workers are excluded. Wages here describe the local healthcare labor market and hiring cost, not clinician shortage severity (see the shortage-designation sections above).

† = ClarityPoint calculation. Every figure carrying this mark was computed by ClarityPoint from the public source files listed under Sources — counts, sums, medians, averages, percentages, coverage rates, shares, per-capita rates, percentiles, distributions, and composite or index values. ClarityPoint calculations are not published, reviewed, approved, or endorsed by any federal agency and must not be cited or reported as agency figures. Figures without the mark are reproduced as the source agency published them.

Designation detail

88 rows. Sorted for readability — not an ClarityPoint rank. Missing values shown as —. Values in this section are reproduced as published by the source agency and carry no ClarityPoint calculation mark (†). Any column header carrying the mark holds a value ClarityPoint computed.

Material changes vs prior vintage

Change tracking for this county began with the HRSA download 2026-09-03 - BLS QCEW 2024 - ACS 5-year 2019-2023 data vintage; the next data refresh will report provider additions, exits, and rating changes.

Methodology

- Source: HRSA HPSA / MUA-P / FQHC public download files, BLS QCEW annual county files, and Census ACS population, compiled offline into a committed, vintage-stamped data artifact (workforce-artifact-2.0.0) covering 3222 counties. The vintages cited are the real download dates.
- Sourced vs. derived figures: values reproduced exactly as the publishing agency released them carry no mark. Figures ClarityPoint computed from those files are marked † — counts, sums, medians, averages, percentages, coverage rates, shares, per-capita rates, percentiles, distributions, and composite or index values. ClarityPoint calculations are ClarityPoint's alone: no agency publishes, reviews, approves, or endorses them, and they must not be cited as agency data.
- Designated and Proposed-for-Withdrawal designations are included; Withdrawn designations are excluded. Rows are deduped by (HPSA ID, county).
- HPSA score is the federal priority score (primary care/mental health 0-25; dental 0-26) as published by HRSA on each designation, reproduced unchanged in the designation detail table. Discipline counts, maximum and median scores, FTE-short and underserved totals, and every benchmark are ClarityPoint calculations over those published rows — HRSA publishes no county rollup.
- BLS QCEW industry cells (employment, establishments, average weekly wage, average annual pay) are reproduced exactly as BLS published them. The combined employment measure is an ClarityPoint sum of disclosed NAICS 621 + 623; 6216 is a subset of 621 and is not added again. It excludes hospitals (622), government and self-employment. If either component is absent or suppressed the combined measure is unavailable, not a partial total.
- Population 65+ is an ClarityPoint sum of the published Census ACS age bands; total population is the published ACS estimate.
- FTE short and underserved population are designation-level figures attributed to each county served; multi-county designations contribute to every county they serve.
- Complete normalized designation, MUA/P and FQHC site rows are retained. All county and discipline metrics are calculated over the complete record set; display pagination does not change totals. Null means the source did not publish a usable value, not an omitted table row.
- Safety-net context (MUA/P designations and FQHC service-delivery sites) is summarized from the same HRSA download files.
- Labor-market context is BLS QCEW annual county data for private-ownership healthcare NAICS (621 ambulatory, 6216 home health, 623 nursing/residential care). QCEW average annual pay and average weekly wage are payroll-per-job AVERAGES, not medians; suppressed cells render as not available.
- State and national comparisons are ClarityPoint calculations: medians and percentiles computed by ClarityPoint across all counties in the committed artifact. No agency publishes them.
- Sellable threshold: >=1 active designation in county.
- Missing values are never imputed as zero.

Limitations

- HPSA boundaries can be sub-county; county rollups may include population-targeted designations that do not cover the entire county.
- Underserved population, served population, and FTE-short figures are designation-level figures attributed to each county served — multi-county designations contribute their full figures to every county they serve, so totals are not county-exclusive.
- Scores and FTE short change when HRSA updates designations — always check the as-of vintage.
- Reference periods differ by dataset: HRSA designations are as of the download date (2026-09-03); QCEW wages cover calendar 2024; population is ACS 5-year 2019-2023.
- BLS QCEW wage/employment figures are county private-ownership averages for broad healthcare NAICS — they are not occupation-specific or median wages, and small-county cells may be suppressed and shown as not available.
- This is a one-time market-screening and preliminary-diligence starter, not investment, staffing, or financial advice, and not a recommendation to open a clinic or apply for any program.
- Not medical advice; not affiliated with or endorsed by HRSA, HHS, CMS, BLS, Census, or HUD.

Sources

The agencies named above published the underlying files. Figures marked † in this report were computed by ClarityPoint from those files and are not agency figures; the agencies have not reviewed or endorsed them.
